Subject: HIV Estimates 2023 Factsheets

Dear Sir/Madam,

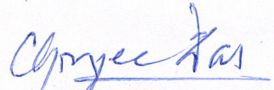

As you are aware, National AIDS Control Organization (NACO), Ministry of Health and Family Welfare, Government of India periodically undertake HIV burden estimation process to provide updated information on the status of the HIV epidemic in India. The first HIV estimation in India was done in 1998, while the last round was done in 2022.

2. India HIV Estimates 2023, the current round in the series, has been initiated in collaboration with regional institutes, with ICMR-NIMS (New Delhi) as the nodal institute. The process engaged SACS at various stages to have local intelligence on the levels and trends of the epidemic. The process for State/UT-wise burden estimation has now been completed under the leadership of Technical Resource Group (Surveillance & Epidemiology).

3. We are sharing factsheet from India HIV Estimates 2023 for your reference. The factsheet provides data on key parameters of HIV prevalence, new infections, and AIDS-related mortality by States/UTs. For programmatic purposes, the evidence generated through the 2023 round will not only guide the location prioritization but also will be fundamental to the monitoring of the progress on 95-95-95. The findings are also used for the national and international reporting like that for Output-Outcome Frameworks, Global AIDS Monitoring Framework etc.

4. We are in the process of providing district-wise disaggregation of the State/UT-estimates. We look forward to active engagement of SI officers from SACS in the process.

5. I am confident that you will be using the latest estimates to inform the programmatic planning. You are welcome to reach out to Dr Pradeep Kumar (National Consultant, Strategic Information, Email: pradeepkr.naco.2023@gmail.com, Mobile: 8373909907) for any further queries.
